Coding, playing Cricket

About Me

Looking for a challenging role in a reputable organization to utilize my technical, database, and management skills for the growth of the organization as well as to enhance my knowledge about new and emerging trends in the IT sector.

Internship

Full Stack web developer

HighRadius

01/2020 - 05/2020

I have made several products like AI enabled fintech B2B cloud application

I have done 4 month internship in highradius where During this internship i was involved in creating full stack web-based product thereby developing a deep understanding of all aspects of product development such as indentifying appropriate user requirement ,designing a great user experience and building appropriate data models and machine learning models along with relevant UI components and backend desing

Projects

Dengue Detector

Using Python and fuzzy logic library

This application will detect dengue symptom in the early stage

<https://github.com/RajuRanjanSingh/Early-self-diagnosis-of-dengue-symptoms-using-fuzzy-logic>

Bill Management System

Using ReactJs ,HTML,CSS,Javascript for front end and for backend i have used java and for database i have used SQL

In this aplication user can add ,edit and delete customer details pending amount and user can search customer by their name and it will show graphical view
